

**HANDS-ON
EXERCISES****PROJECT 5.2****PROJECT 2: Book Rep Customer Relations Management****DIFFICULTY LEVEL:** Intermediate**Overview**

Demonstrate your proficiency with absolute positioning and floats by modifying `chapter05-project02.css` so that `chapter05-project02.html` looks similar to that shown in Figure 5.39.

Instructions

1. Examine `chapter05-project01.html` in the browser. The HTML does not need to be modified for this project.
2. You will create the three-column layout using absolute positioning and margin settings as described in Section 5.4.1.
3. Within the main column, the company and client addresses will use floats rather than positioning.
4. Within the boxes for recent messages, weekly changes, and top sellers, you will need to use floats, block display, and padding values.

Testing

1. Be sure to test by increasing/decreasing the browser zoom level. If you have used `em` units for font sizes and most margin and padding values, it should scale to the different zoom levels.
